SUPER SEEDER

(MULTI - CROP)

The Jagatjit Super Seeder Multi Crop is an advanced and highly efficient agricultural implement designed to sow multiple crops while simultaneously managing crop residues. Built with precision engineering and superior durability, this machine is the perfect solution for farmers looking to optimize field preparation, improve soil health, and boost productivity.

TECHNICAL SPECIFICATION

Variant	5 ft	6 ft	7 ft	8 ft	9 ft
Working Width (mm)	1524	1905	2100	2490	2685
Primary Drive	13x23 multi speed gear box with original gear set				
Secondary Drive	21-36-26				
Tertiary Gear Drive	15-28-15-22-22-22				
No. of Blades in Rotor	42	48	54	60	66
Blade Material	Spring Steel				
Blade Type	LJF				
Fertilizer Tank Capacity	50	50	60	70	80
Seed per Tank Capacity	3 kg per container				
Per Acre Seed Recommended	40-50 kg				
Seed Disc Availability	Rice, Maize, Peanut, Moong, Mustard (4th type of Disc)				
Sprocket Option	13 teeth to 26 teeth				
No. of Disc	7	10	11	13	14
Tractor Power (hp)	40 & above	45 & above	50 & above	60 & above	65 & above

Salient features:

- Fitted with high-performance LJF-type blades arranged in a helical pattern for efficient crop residue cutting and mixing.
- Suitable for various crops like paddy, maize, mustard, moong, wheat, etc.
- Shreds & incorporates previous crop residues into the soil, enhancing organic matter.
- Reduces burning of crop stubble, promoting sustainable farming practices.
- Heavy-Duty Rotor & Robust Frame ensures long-lasting performance even in tough soil conditions.
